Two Awards. One Incredible Laser.

The MiXto Fractional CO₂ Laser delivers winning results to capture the *Best Non-Surgical Facial Rejuvenation Enhancement Award** two years in a row.

MiXto leads the way in micro fractional CO₂ laser skin resurfacing for all skin types, easily outperforming all other energy-based systems – lasers, RF, and other heat producing devices. This award-winning technology combines the CO₂ gold standard for skin resurfacing with a unique patented scanner to deliver a precise matrix of Microspots that penetrate to the dermis and stimulate new collagen growth.

You'll see more results after one MiXto treatment than competing devices can deliver in three treatments. Patients can expect less discomfort and faster recovery times.

Learn how easy it is to achieve award-winning results for your patients with the MiXto Fractional CO₂ Laser. Visit www.mixtoskinresurfacing.com today.

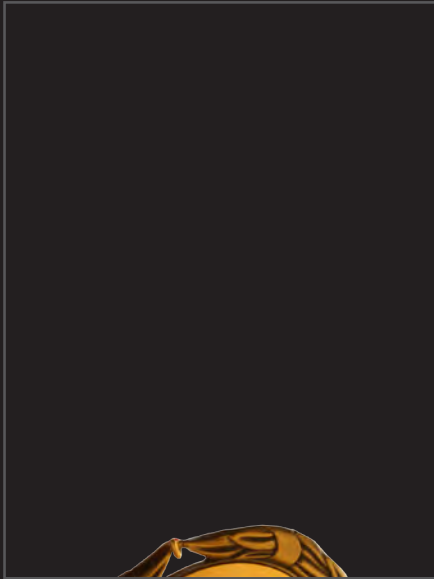

*The Aesthetic Show, Las Vegas, Nevada

Will you be the 2013 award winner with MiXto?

LASERING USA invites you to experience the same award-winning results with your patients. To get you ready for 2013, we're throwing a **Red Carpet Celebration**, complete with a very special offer.

<<Title, First, Last Name>>
